

Cassandra Health Check

This package provides an independent review of your operational Apache Cassandra® deployment to identify and remediate configuration, schema, and infrastructure problems that are causing sub-par performance.

The **Cassandra Health Check Package** has been designed to help customers who have already deployed and have operational applications, but are looking for assurance that their solution is scalable and is free from any potential issues. The package is mostly used by our customers who are in the Operate stage.

Inclusions

The Cassandra Health Check Package typically takes 1 to 2 weeks and consists of the following steps:

- **Questionnaire:** Instacluster consulting experts will provide a questionnaire asking for information about your use of Cassandra.
- **Meeting:** You fill out the questionnaire and return it to us. Then we will schedule an online meeting to review your answers and clarify information where needed.
- **Data Model Review:** Involves reviewing your data model and current usage and highlight any issues or areas which can be improved.
- **Capacity Need Review:** Instacluster's team of expert consultants review your current and projected volumes to validate current cluster size and scalability required.
- **Infrastructure Review:** This includes a review of your current infrastructure choice to understand if the operational environment is most effective and efficient for your current and intended workloads.
- **Reports:** Our experts review the information provided and ask for any necessary clarifications via email or online meetings, and then provide a detailed written report of the review outcomes.
- **Q&A:** After you receive the report, we schedule a final online meeting to review the findings and ensure you understand any recommendations or issues highlighted.

Additional Support and Knowledge Transfer

Many customers also choose to add additional consulting days to their Cassandra Health Check Package for knowledge transfer activities and/or assistance with implementation of the recommendations of the review.

Key Outcomes

Instaclustr Cassandra Health Check Package works towards identifying risks and issues along with opportunities available for improvement. Once implemented, the package will provide:

- ✓ Increased surety that your cluster will cope with future demand.
- ✓ Opportunities for improved performance and reliability.
- ✓ Potential reductions in infrastructure spend.
- ✓ Increased understanding of Apache Cassandra® and potential pitfalls.
