

DESIGN, DEVELOP, AND DEPLOY

Professional services for open source data technologies

Microsoft Azure

On-prem

Hybrid

Strategy. Architecture. Development. Deployment. Training.

NetApp® Instaclustr Professional Services provide a one-stop shop for open source data technologies, tailored to fit your needs and budget. Instaclustr enables you to design, optimize, and maintain robust open source solutions for mission-critical applications.

WHY CHOOSE PROFESSIONAL SERVICES FOR OPEN SOURCE?

One-vendor relationship

Instaclustr Professional Services provides a single source for open source technologies. A unified partner provides consistent critical architecture standards, centralized expertise, and end-to-end accountability—enabling you to save time, money, and reduce risk.

Migration to open source

Instaclustr Professional Services provides expert assistance for customers wanting to migrate from proprietary to open source technologies to reduce cost and vendor lock-in. Our fixed-fee migration assessment package provides the roadmap for your migration journey.

Simple, low-risk engagements

Instaclustr Professional Services offers several fixed-fee packages to simplify procurement and streamline solutions that drive productivity. Packages include health check, cloud cost optimization, architecture assessment, migration assessment, training, and more.

On-demand services

Instaclustr Professional Services provides expertise for customers needing services like configuration, query optimization, development, deployment, general troubleshooting, and custom solutions.

No matter the problem, we have the solution

Fixed-fee packages

Health check: Prevent outages

Cost optimization assessment: Save money

Architecture assessment: Grow in pace

Migration assessment: Confidence to change

Training: Empower your team

On-demand services

Dedicated consultant(s): Available when you need it on a time and materials basis.

Embedded: Get expertise from dedicated consultants to augment your DBA or project team, from planning to performance.

*All backed by next business day SLA

Bespoke / Project-based services

Custom solutions to meet your open source needs: tech validation, upgrades, migrations, scaling, high availability, backup strategy, testing, benchmarking, and more.

INSTACLUSTER MANAGED AND SUPPORTED TECHNOLOGIES

Store

PostgreSQL®

The world's leading object-relational database system, now with Azure NetApp Files—up to 3x faster TPS at a fraction of the cost.

Apache Cassandra®

A NoSQL database with continuous availability and tremendous scale.

Stream

Apache Kafka®

The leading streaming and queuing technology for large scale, always-on applications.

Apache Kafka® Connect

A robust framework for hosting connectors and managing connector configurations between Apache Kafka and other data systems.

Analyze

ClickHouse®

A leading open source database designed to process high volumes of data in real-time, making it ideal for big data and analytics.

Search

OpenSearch®

The go-to search and analytics suite for data ingest, logging, search, aggregation, viewing, and analysis.

Orchestrate

Cadence®

Simplify the development and operation of workflow-style business logic with this service and programming framework.
